

# YOUNG BASILE

## Industry | Electronics & Semiconductors

With offices in Silicon Valley and the Boston area, our firm provides patent procurement and counseling services to a variety of clients in the semiconductor and electronics industries, including large multinational corporations, midsize businesses, venture-backed startups, and other emerging companies.

In addition to technologies in the semiconductor industry, our patent professionals have experience in variety of electronics-related technology areas, including automotive electronics, processor design and manufacturing, telecommunications, photonics, and consumer electronics. Some of our professionals have Ph.D. level training to assist clients building portfolios in emerging technologies such as quantum computing and quantum communications. Some of our professionals also have extensive industry experience, including in-house intellectual property management experience, providing insight that enables us to be strategic partners in our clients' businesses.

Our clients include vendors of electronics and semiconductor chips as well as suppliers of equipment and software to the semiconductor industry. The firm also represents buyers of semiconductor fabrication and ASIC development services.
